 - Converted the A2 project into a flask project.
- Harrison Iruthayathas -> 0 %
 - Worked on the following : None.
- Agha-Bala Gulmaliyev -> 30%
 - Worked on the following :
 - Created request database to store information regarding student requests for remarking
 - Created grade page for students with an option to request a remark and provide a reason for it
 - Created grade page for Instructors with an option to regrade students and view remark request reasons

NOTE FOR MARKER :

I (Shawn) have tried to contact Harrison through various but has been completely unresponsive and so he was not able to contribute towards the assignment. Agha was added to the group late and so had not many tasks left to complete.

We were able to complete all the required features but we were not able to improve the overall responsiveness of the website .ie changing to page elements to responds to change in width and such.
